C. N. CONGDON,  
Registrar of Voters,  
TYLER B. GUY,  
Auditor,  
DANIEL W. MCKEIL,  
Tree Warden,  
FRANCIS E. BECKWITH.

## WHERE EVERY MAN SHOULD VOTE RIGHT.

There are two things to be acted upon by the voters of the towns of this state at the town election which should command popular attention and non-partisan action. One of them concerns the lieutenant governor, who should be given power to act in the absence of the executive.

The other amendment is one that concerns the present disfigurement of the state and that is the limiting of the sessions of the general assembly. The proposed amendment provides that the legislature shall not remain in session after the Wednesday following the first Monday in June.

There is really no excuse for authorizing a six months' session of the general assembly. The sessions of the larger states have a limit of 90 days; but the limit here in the early weeks of the session, which are marked by these sessions, perhaps, of two hours each, makes it necessary to allow for dilly-dallying tactics, and six months' time is the outside limit where any attempt has been made to shorten legislative sessions.

The voters should be awake to these matters and be sure and register their will with regard to them.

## CRIMINAL WOMEN.

We do not like to think of America as having more criminal women in proportion to the population than other countries; but like statistics of crime made public by William Nathan MacCheesney, president of the American Institute of Criminal Law and Criminology, at the annual conference, leaves no doubt upon this matter.

It appears from Mr. MacCheesney's figures that women commit 70 per cent. of poisonings; this crime and infanticide are increasing. Only 19 per cent. of crime in America is committed by women, while in Great Britain 25 per cent. is by the sex, but America has more criminal women in proportion to numbers than Great Britain, one to every 720 here being classed as criminal, against one to every 1,764 in Great Britain. Habitual crime appears to be increasing among women, one-seventh of the number of women committed to prison having already been committed 11 to 20 times.

The Chicago Record-Herald, noticing these facts, says: "The inference is that modern civilization is producing a distinct criminal class of women as a result of the greater economic and social freedom acquired by the sex. Perhaps the formation of such a class is one of the inevitable results of a complex civilization; perhaps it is one of the penalties of freedom. We cannot believe, however, that women are any more criminally minded than they were when their life and work were confined to the home; many offenses now classed as crimes were not then made public when committed by the sex. The race is going forward, not backward, individually and socially. Statistics must be carefully scrutinized and used with caution."

## THE FIRST TO ACT.

The state of Connecticut made a record as the first state in the union to pass a redistributing law in accord with the recent act of congress, which is not at all to her discredit.

While there is a little sharp criticism of the haste and the manner in which the work was done in this state, by calculating partisans the press in the neighboring states, after looking at the plan of the division, do not hesitate to pronounce it an example of fair work which is creditable to the men having it in charge and to the state.

A state exchange of non-partisan personalities says: "It was one of the most important acts of the legislature, accompanied with remarkable celerity and an entire absence of fireworks."

It is believed that the work has been so honorably done that Governor Baldwin will sign the act, making it an operative law.

The Bulletin bids good-bye to the Old Third and welcomes the birth of the Second congressional district, which makes one political family of the four eastern counties of the state.

The editor of the Baltimore American advises women not to try to fly, saying in conclusion: "We would rather have them on earth than in heaven!"

## THE NEW ANTI-CIGARETTE LAW.

The amended cigarette law is of interest to all dealers in the state, since the state superintendent of the reform bureau, Rev. Bennett C. Bennett, of Cromwell, proposes to do all the active work possible for its enforcement.

The law now reads as follows:  
Section 1—Every person who shall sell, give, or deliver to any minor under sixteen years of age, tobacco in any form, shall be fined not more than twenty-five dollars for the first offense, and not less than twenty-five dollars, nor more than one hundred dollars for each subsequent offense.

Section 2—Every person under sixteen years of age, who shall smoke, or in any way use, in any public street, place or resort, tobacco in any form whatsoever, shall be fined not more than seven dollars for each offense.

Mr. Miller is sending out to representative citizens in all towns of the state the following notice:  
The undersigned gave a great deal of time and had a great deal of trouble in securing the passage of Section 1 of the above law. Now, will you not rally to its enforcement? Encourage and co-operate with the officers of your town or city in securing strict enforcement of it—particularly Section 1. By personal appeal or letter, by resolutions at mass meetings, lodges, churches, associations, churches and elsewhere assure the local officers of your desire for its enforcement.

"We have had printed large cards (sized 11 by 14 inches) in large type for store windows, churches, and other conspicuous places, copies of this law. How many will you agree to have put up in conspicuous places in your town? Just drop me a postal and they will be forwarded to you, free of charge. Kindly send me the name of your pastor, when writing. Every church should have one or two posted up in it."

He expects during the year to work in the schools of the state, and so far as possible, to check this evil.

## AN OFFICIAL OPINION.

The retirement of Deputy Warden George E. Baldeen of the state prison at Wethersfield is the loss to Connecticut of an old and efficient associate. Deputy Warden Baldeen has always displayed a progressive spirit, and leaves behind him the reputation of being a kind-hearted man. All these years of experience appear to have taught him that the time to save men is in their youth. He firmly believes that it is easier to make good citizens of them before they have passed through crime and become hardened, than to deal with them after-wards.

Speaking of him, the Bristol Press takes occasion to say:  
"Despite the disillusionment of his years of experience, Deputy Warden Baldeen has always been ready to render such service to his former charges as he might, for he is essentially a kind-hearted man. His retirement is a loss to the state, and his departure is a loss to the time to save men in their youth. He firmly believes that it is easier to make good citizens of them before they have passed through crime and become hardened, than to deal with them after-wards."

There is really no excuse for authorizing a six months' session of the general assembly. The sessions of the larger states have a limit of 90 days; but the limit here in the early weeks of the session, which are marked by these sessions, perhaps, of two hours each, makes it necessary to allow for dilly-dallying tactics, and six months' time is the outside limit where any attempt has been made to shorten legislative sessions.

The voters should be awake to these matters and be sure and register their will with regard to them.

## EDITORIAL NOTES.

Boys who are planning to make the campaign lively should be sure to try to keep it clean.

We shall all be glad when Maine gets her returns in and the official count is announced.

A Chicago politician is being taunted with being a relic of the stone age—not the polished stone age.

Notwithstanding the high price of brooms the republicans are anticipating a clean sweep this fall.

Paris is giving notice that the hoop skirt is about to come in again. Not with the high-top trolley car.

There can be no disputing that the smile Dr. Wiley is wearing now is the pure and unadulterated article.

Thomas A. Edison denies that he is an atheist. He believes in the eternal mind as his mind interprets it.

The people who are driven wild by all city noises can easily be rid of them by seeking a home in the wilderness.

England appears to be out of coal 115 years from now; but this fact has nothing alarming about it to King George.

Since Taft was president he has traveled 61,000 miles, but it does not appear to have told upon his corporeity.

An Indiana man of 82 is about to marry a woman of 66 and this leads to a suspicion that his mind has gone back on him.

The benesote of soda has no reason to think that it can redeem its character since Dr. Wiley's character has been approved.

It will not make any difference how the citizens feel in the places the president visits—the brass bands are bound to play.

Happy thought for today: No man can find out how much the public knows about him that is not so until he runs for office.

This country imported a million pocket knives in July; and Uncle Sam has the reputation of turning out a pretty good knife, too!

Bethah Blinford is so anxious to carry her story into every home in the land that she has been plainly told it is better suited to the garbage can.

The St. Albans Messenger remarks: "If the old saw about the first snow on Mount Mansfield holds true, Vermont editors should prepare to don their milk-lined overcoats in about six weeks."

Canada and United States. Another resemblance between this country and Canada has been developed by the reciprocity campaign. The Canadians play politics in much the same way that we do—Indianapolis News.

## THE BULLETIN'S DAILY STORY

### HOME AGAIN

"The Budingers have returned from Europe," said Mrs. Jamesworthy, in a casual way. "I met Mrs. Budinger this morning and she says they had a grand time."

"Yes, and I met Budinger," replied Jamesworthy, "and he started in to bore me with a long story about a voyage on the Rhine or the Vesuvius or some other cheap John river. I headed him right off, telling him I'd be ashamed to be seen paddling up and down the paper creeks of Europe when we have the real things in rivers here at home. When I want a voyage of that kind I'll choose some good American river. Old Budinger was gnashing his teeth he was so anxious to tell me about his experiences in Europe, but I wouldn't stand for it."

"But they had a grand time, Mrs. Budinger says, and the cost was surprisingly low. Just think! Mr. and Mrs. Budinger and the two children made the tour of the continent and it cost only—"

"Don't care what it cost, I see what you are driving at, Mrs. Jamesworthy. Since you met Jane Budinger you are frantic to go to Europe next year, but the best thing you can do is to forget it, for that's one thing I won't consent to do while I have a drop of blood in my veins. I'm going to sell my life as dearly as possible this trip, Mrs. Jamesworthy, and you chloroform me and put a shawl strap around me, I believe in standing up for home industries. I expect to take you and the children for an outing next summer, but you can bet your earrings it won't be to Europe."

"You must admit that it gives people a kind of distinction to make a tour of Europe."

"It doesn't do anything of the kind. It makes a man an outcast, an Ishmael, with the hand of every fellow citizen raised against him. You should have seen Budinger this morning. He came teetering down the street just like a man with a story of the things he saw. He ran up against some old mountains in Greece by the voice or by some other means. After the cylinder had received its full impression it is laid away and preserved for some years while the phonograph is destroyed. By the cylinder is taken from its place and put into a new phonograph, where the original sounds are reproduced. Thus it is that the individual character is formed by the impressions received in the daily experiences of life. In course of time the body is destroyed and the character or identity is preserved by the Lord, who knows how and where. In the resurrection the character (wax cylinder) will be placed in a new body (machine), and the original thoughts, memory, etc., will be reproduced. A fine 'record' will be placed in a high class machine. A poor record (if not destroyed because of worthlessness) will be placed in a 'lower grade instrument.'"

## Bible Question Box

Your Bible questions will be answered in these columns, and if sent to our Bible Question Box Editor.

J.—Since the Apostle clearly explains in 1 Corinthians xv, 35-38, that the body will not be resurrected, what does he mean when he says: "So also is the resurrection of the dead. It is sown in corruption, it is raised in incorruption," etc. (1 Corinthians xv, 42-44)? What is resurrected?

Answer.—We answer that "it" is the soul that is restored or resuscitated. What was it that died? The Scripture reply is—"The soul that smiteth it shall die." The living, intelligent, sentient being is to be raised up by Divine power in the time of resurrection. The body of the man or woman shall come forth. A photograph with recording cylinder furnishes an excellent illustration of the resurrection. The cylinder placed in the machine will have impressions formed upon it by sounds produced

or Switzerland, or somewhere, and he was bound and determined to describe them. And he had some photographs that he tried to bluff people into looking at, but everybody sidestepped him. You should have seen even the prominent citizens and leading business men dodging him as though he had just escaped from the lunatic house. He did manage to corner a few victims, but as soon as he mentioned the dinky mountains or four-flushing rivers he had seen, they began to abuse him, just as I did, telling him that they wouldn't be found dead among such scenery."

"That's the sort of distinction his trip abroad has given Budinger. He's a marked man. If he was a leper, wearing a bell, he couldn't be more shunned than he will be from now on. The last I saw of him this morning he was begging a policeman to look at his photographs, and the cop looked at them and said: 'Get in the hurry up wagon. I wouldn't be in his shoes for a lot of rupees, and I came home with a more interesting self than I had with a wife with no globe-trotting ambitions. Yet as soon as I step into the house you begin your campaign for a trip to Europe. It's enough to make a man's reason totter on its throne.'"

"You're jumping ginger!" groaned Jamesworthy. "So you've been leading up to a lecture all this time? And you know how I hate lectures! I'd rather have my teeth pulled by a tin-smith's apprentice than go to a lecture! Let's compromise and go to the moving picture show and see the James brothers robbing a train!"—Chicago News.

By the voice or by some other means. After the cylinder had received its full impression it is laid away and preserved for some years while the phonograph is destroyed. By the cylinder is taken from its place and put into a new phonograph, where the original sounds are reproduced. ## Why is the soda cracker to-day such a universal food?

People ate soda crackers in the old days, it is true—but they bought them from a barrel or box and took them home in a paper bag, their crispness and flavor all gone.

To-day there is a soda cracker which is the recognized staple—Uneeda Biscuit.

Uneeda Biscuit are the most nutritious food made from flour and should be eaten every day by every member of the family from the youngest to the oldest.

Uneeda Biscuit—soda crackers better than any ever made before—made in the greatest bakeries in the world—baked to perfection—packed to perfection—kept to perfection until you take them, oven-fresh and crisp, from their protecting package.

NATIONAL BISCUIT COMPANY

## NOTICE

Change In Bank Hours

On and after August 1st, 1911, the Jewett

City Savings Bank of Jewett City, Conn., will

be open every business day (except Saturdays) from 10 o'clock a. m. to 3 o'clock p. m.,

closing Saturdays at 12 o'clock.

FRANK E. ROBINSON, Treasurer.
